HTML and (S)CSS

Responsive Web Design

Accessibility & Progressive Enhancement

Vanilla JavaScript

Web Components, LitElement, and Vue

Jest, Mocha, and Chai

Redux and Redux-Saga

Webpack, Git, and Continuous Integration

Docker

Kind Words

I have worked together with Stefan on front-end projects for over 10 years, and the work was always done on time, on budget, and with a high degree of professionalism.

It's obvious he takes tremendous pride in his work, and I wouldn't hesitate to recommend or work with him again.

*Thomas Nitsche, VP of Engineering,
Experteer GmbH*

Stefan has been supporting the company for years. He played a key role in developing our front-end further and always delivered on time and with great additional ideas.

I would definitely work with Stefan again and can highly recommend him.

*Nina Zimmermann, CEO, tracdelight
GmbH*

Personal Statement

I'm a front-end developer with a focus on HTML, CSS, Accessibility and Progressive Enhancement and I like to limit myself to browser APIs whenever possible.

Features that used to require libraries or frameworks can now easily be implemented using vanilla JavaScript.

Professional Experience (extract)
